# **Energy performance certificate (EPC)**

65, Killeavy Road NEWRY BT35 6ET

Energy rating

Valid until: 25 July 2031

Certificate number: 6439-7523-5000-0546-2222

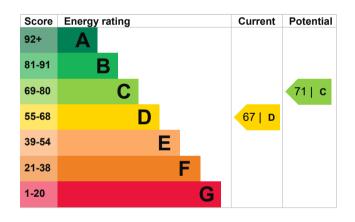

Property type Top-floor flat

Total floor area 72 square metres

# **Energy efficiency rating for this property**

This property's current energy rating is D. It has the potential to be C.

See how to improve this property's energy performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in Northern Ireland:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating	
Wall	Cavity wall, filled cavity	Average	
Roof	Pitched, insulated at rafters	Average	
Window	Fully double glazed	Good	
Main heating	Electric storage heaters	Average	
Main heating control	Automatic charge control	Average	
Hot water	Electric immersion, off-peak	Average	
Lighting	Low energy lighting in 80% of fixed outlets	Very good	
Floor	(another dwelling below)	N/A	
Secondary heating	Portable electric heaters (assumed)	N/A	

### Primary energy use

The primary energy use for this property per year is 385 kilowatt hours per square metre (kWh/m2).

Environmental impact of this property  One of the biggest contributors to climate change is carbon dioxide (CO2). The energy used for heating, lighting and power in our homes produces over a quarter of the UK's CO2 emissions.		This property's potential production	4.1 tonnes of CO2
		By making the <u>recommended changes</u> , you could reduce this property's CO2 emissions by 0.6 tonnes per year. This will help to protect the environment.	
An average household produces	6 tonnes of CO2	Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.	
This property produces	4.7 tonnes of CO2		

## How to improve this property's energy performance

Making any of the recommended changes will improve this property's energy efficiency.

If you make all of the recommended changes, this will improve the property's energy rating and score from D (67) to C (71).

Recommendation Typical installation cost Typical yearly saving

1. High heat retention storage heaters £1,200 - £1,800

#### Paying for energy improvements

Find energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

# Estimated energy use and potential savings

Estimated yearly energy cost for this property

Potential saving £1020

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The estimated saving is based on making all of the recommendations in <u>how to improve this</u> <u>property's energy performance</u>.

£144

### Heating use in this property

Heating a property usually makes up the majority of energy costs.

# Potential energy savings by installing insulation

The assessor did not find any opportunities to save energy by installing insulation in this property.

## Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
