Luxury Turnkey Specification

Affordable and sustainable homes that impress from the moment you arrive.

We take our environmental responsibilities seriously – high specification insulation and robust windows/doors, inline with new building regulations help to keep draughts out and retains warmth. Modern energy efficient heating systems reduce the amount of energy used to heat our homes, which helps reduce carbon emissions therefore ensuring lower electricity and heating bills.

We use sustainable and recycled materials where possible, and fit dual flush toilets and energy saving lightbulbs to help you commit to a more eco-friendly way of life.

When calculating the annual energy cost for these homes at Drumnagoon Park, they received an extremely high SAP rating. SAP is a measure of how energy efficient a home is, assessing the costs of heating, ventilation and lighting. The higher the SAP rating, the lower the costs for you.

INTERNAL FEATURES
