Energy performance certificate (EPC)

28 Hazelwood Avenue Dunmurry	Energy rating	Valid until:	9 September 2031
BELFAST BT17 0SY	E	Certificate number:	0360-2200-0010-2599-6905

Property type

Semi-detached house

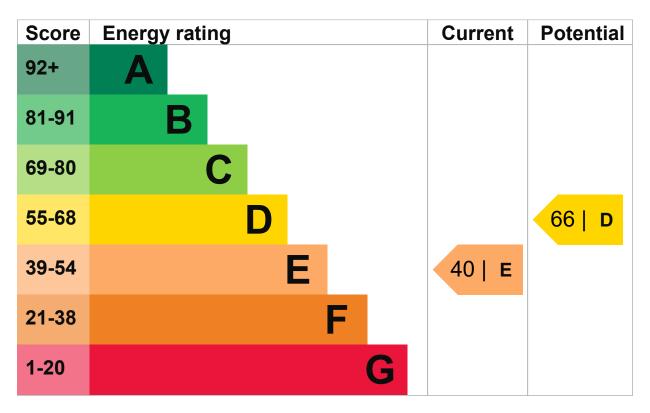

Total floor area

80 square metres

Energy efficiency rating for this property

This property's current energy rating is E. It has the potential to be D.

See how to improve this property's energy performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be. https://find-energy-certificate.digital.communities.gov.uk/energy-certificate/0360-2200-0010-2599-6905 For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, insulated (assumed)	Average
Window	Fully double glazed	Average
Main heating	Boiler and radiators, oil	Average
Main heating control	Programmer, no room thermostat	Very poor
Hot water	From main system, no cylinder thermostat	Very poor
Lighting	Low energy lighting in 81% of fixed outlets	Very good
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, electric	N/A

Primary energy use

The primary energy use for this property per year is 348 kilowatt hours per square metre (kWh/m2).

What is primary energy use?

Environmental impact of this property

One of the biggest contributors to climate change is carbon dioxide (CO2). The energy used for heating, lighting and power in our homes produces over a quarter of the UK's CO2 emissions.

An average household produces

6 tonnes of CO2

This property's potential production

3.9 tonnes of CO2

By making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 3.1 tonnes per year. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

How to improve this property's energy performance

Making any of the recommended changes will improve this property's energy efficiency.

If you make all of the recommended changes, this will improve the property's energy rating and score from E (40) to D (66).

What is an energy rating?

Recommendation 1: Hot water cylinder insulation

Insulate hot water cylinder with 80 mm jacket

Typical installation cost

Typical yearly saving

Potential rating after carrying out recommendation 1

Recommendation 2: Hot water c	ylinder thermostat
--------------------------------------	--------------------

Hot water cylinder thermostat

Typical	vearly	saving
Typicui	youny	Suving

Potential rating after carrying out recommendations 1 and 2

53 | E

Recommendation 3: Heating controls (room thermostat and TRVs)

Heating controls (room thermostat and TRVs)

Typical installation cost

£350 - £450

Potential energy

rating

£15 - £30

£184

52 | E

£200 - £400

£18

Typical yearly saving

	£134
Potential rating after carrying out recommendations 1 to	o 3
	60 D
Recommendation 4: Floor insulation (suspe	ended floor)
Floor insulation (suspended floor)	
Typical installation cost	
	£800 - £1,200
Typical yearly saving	
	£52
Potential rating after carrying out recommendations 1 to	o 4
	62 D
Recommendation 5: Heat recovery system	
Heat recovery system for mixer showers	
Heat recovery system for mixer showers	for mixer showers
Heat recovery system for mixer showers Typical installation cost	for mixer showers
Heat recovery system for mixer showers Typical installation cost Typical yearly saving	for mixer showers £585 - £725 £19
Heat recovery system for mixer showers Typical installation cost	for mixer showers £585 - £725 £19

Recommendation 6: Replace boiler with new condensing boiler

Condensing boiler

Typical installation cost

£2,200 - £3,000

	240
Potential rating after carrying out recommendations 1	to 6
	66 D
Recommendation 7: Solar water heating	
•	
Solar water heating	
Typical installation cost	
	£4,000 - £6,000
Typical yearly saving	
	£34
Potential rating after carrying out recommendations 1	to 7
	69 C
Recommendation 8: Solar photovoltaic pa	inels, 2.5 kWp
Solar photovoltaic panels	
Typical installation cost	
	£3,500 - £5,500
Typical yearly saving	
	£326
Potential rating after carrying out recommendations 1	to 8
	79 C
Paying for energy improvements

Estimated energy use and potential savings

Estimated yearly energy cost for this property

Potential saving

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The estimated saving is based on making all of the recommendations in how to improve this property's energy performance.

Heating use in this property

Heating a property usually makes up the majority of energy costs.

Potential energy savings by installing insulation

The assessor did not find any opportunities to save energy by installing insulation in this property.

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
