# **Energy performance certificate (EPC)**

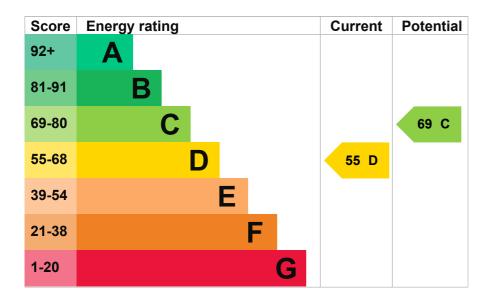

Property type Semi-detached house

**Total floor area** 96 square metres

## **Energy rating and score**

This property's energy rating is D. It has the potential to be C.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

# Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, partial insulation (assumed)	Average
Roof	Pitched, 100 mm loft insulation	Average
Roof	Roof room(s), insulated	Average
Window	Fully double glazed	Average
Main heating	Boiler and radiators, oil	Average
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Average
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, dual fuel (mineral and wood)	N/A

### Primary energy use

The primary energy use for this property per year is 237 kilowatt hours per square metre (kWh/m2).

About primary energy use

#### **Additional information**

Additional information about this property:

· Cavity fill is recommended

# How this affects your energy bills

An average household would need to spend £912 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £270 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2022** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

# Impact on the environment

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

#### Carbon emissions

An average household produces	6 tonnes of CO2
This property produces	5.9 tonnes of CO2
This property's potential production	4.0 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Changes you could make

▶ Do I need to follow these steps in order?

Step 1:	Cavity	wall	insulation
---------	--------	------	------------

Typical installation cost	£500 - £1,500
Typical yearly saving	£69
Potential rating after completing step 1	59 D

# Step 2: Hot water cylinder insulation

Increase hot water cylinder insulation

Typical installation cost	£15 - £30
Typical yearly saving	£21
Potential rating after completing steps 1 and 2	60 D

## Step 3: Room-in-roof insulation

Typical installation cost	£1,500 - £2,700
Typical yearly saving	£97
Potential rating after completing steps 1 to 3	65 D

## **Step 4: Floor insulation (suspended floor)**

Typical installation cost	£800 - £1,200
Typical yearly saving	£63
Potential rating after completing steps 1 to 4	68 D

## Step 5: Heat recovery system for mixer showers

Typical installation cost	£585 - £725
Typical yearly saving	£18
Potential rating after completing steps 1 to 5	69 C

### Step 6: Solar water heating

Typical installation cost	£4,000 - £6,000
Typical illotaliation cost	27,000 20,000

Typical yearly saving £39

#### Potential rating after completing steps 1 to 6

72 C

### Step 7: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£3,500 - £5,500
Typical yearly saving	£321

Potential rating after completing steps 1 to 7

81 B

### Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

### Who to contact about this certificate

#### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Colin Craig
Telephone	02866 387978
Email	c.l.craig@hotmail.co.uk

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
Assessor's ID	EES/005568
Telephone	01455 883 250
Email	enquiries@elmhurstenergy.co.uk

#### About this assessment

Assessor's declaration	Employed by the professional dealing with the property transaction
Date of assessment	18 January 2022
Date of certificate	18 January 2022
Type of assessment	► <u>RdSAP</u>

# Other certificates for this property
